EDUCATION

Dipl.-Ing. Software Engineering and Internet Computing
TU Wien - Technical University of Vienna
2021 – 2026

Computer Science - Exchange Semester
Københavns Universitet - University of Copenhagen
Aug 2022 – Feb 2023

BSc Software and Information Engineering
TU Wien - Technical University of Vienna
Mar 2017 – Feb 2021

SKILLS

Languages	TypeScript, Python, JavaScript, PHP, Java
Frontend	React, Vue.js, Angular, HTML/CSS
Backend	Flask, Deno, Node.js, Laravel
Data	MySQL, PostgreSQL
Integrations	Slack, MS Teams, ServiceNow, Ansible, Kubernetes
DevOps	AWS, Azure, Docker, CI/CD, Git
AI & Agents	Claude Code, GitHub Copilot, MCP, LangChain, Agent Skills
Domain	Observability, Workflow Automation, ChatOps
Practices	Mentoring, Technical Hiring, Product Collaboration

LANGUAGES

German	Native
English	Fluent

PROFILE

Full-stack engineer with 9 years of experience, strongest in React and TypeScript with Python on the backend. Currently building workflow automation and messaging on the Dynatrace observability platform; previously a founding engineer at a legal tech startup. Daily user of AI-assisted development.

EXPERIENCE

Dynatrace — *Vienna, Austria*

Software Engineer — Jan 2024 – Present

Full-stack engineer on the Dynatrace observability platform, Team Captain until Mar 2026.

- Built 3rd-party integrations for the workflow automation product (React, TypeScript), including Slack, MS Teams, AWS, Azure, Kubernetes, ServiceNow, and Red Hat Ansible, aligning with other teams on shared contracts and driving release and delivery.
- Developed a platform messaging service in Python and Flask that lets customers interact with Dynatrace directly from Slack and MS Teams (ChatOps), consumed by other teams across the platform.
- Led creation of a team-internal Claude Code plugin that turns individual agent skills into a shared, reusable library used by all 7 team members; integrated GitHub Copilot, LangChain, and MCP into the team's engineering workflows.
- As Team Captain, worked with the Product Owner on scoping and priorities, and led hiring: interviewed ~10 candidates, 4 hired.

React · TypeScript · Python · Flask · Deno · Workflow Automation · Integrations · Observability · Team Leadership · Claude Code · AI Tooling · MCP

World4You Internet Services GmbH — *Vienna, Austria*

Software Engineer — Jul 2023 – Dec 2023

Developed and maintained web hosting platform features, working across frontend and backend systems to improve customer-facing products and internal tooling.

PHP · Vue.js · Docker

Advoodle Legal Tech GmbH — *Vienna, Austria*

Software Engineer — Jul 2019 – Jun 2023

Founding full-stack engineer in a team of 4 at a legal tech startup. Built and shaped the core platform enabling users to manage dynamically created contracts - from employment to real estate - including KYC workflows and multi-stakeholder processes. Drove fundamental architecture decisions, including the MySQL data model, and mentored junior developers.

Vue.js · Laravel · Docker · Full-Stack

TU Wien - Technical University of Vienna — *Vienna, Austria*

Tutor — Sep 2020 – Aug 2022

Tutored students in group projects for two courses: Software Engineering & Project Management, and Requirements Engineering & Specification. Taught Agile methodology, Requirements Engineering, Java Spring, and Angular.

Teaching · Agile · Requirements Engineering · Java Spring · Angular

Hebotek — *Vienna, Austria*

Web Developer — Oct 2017 – Jul 2019

Development and maintenance of TYPO3 websites and custom projects for various customers.

Angular · Node.js · React · Laravel · TYPO3
